R.R.I.M.

LOCATION. The Institute's offices and laboratories are at the third mile, Jalan Ampang, Kuala Lumpur and are open from 8 a.m. to 12.45 p.m. and from 2 p.m. to 4 p.m. Mondays to Fridays and from 8 a.m. to 12.30 p.m. on Saturdays (except public holidays).

EXPERIMENT STATION AND FACTORY. The R.R.I.M. Experiment Station and Factory are situated at Sungei Buloh, 16 miles from Kuala Lumpur, on the Kepong–Kuala Selangor road. Visits to the Station may be made by prior arrangement, on Mondays and Wednesdays. There is a guest house.

CORRESPONDENCE. All correspondence should be addressed to *The Director, Rubber Research Institute of Malaya, P.O. Box 150, Kuala Lumpur, Malaysia.* However, special enquiries may be marked for the attention of Divisions and individual officers. The telegraphic address of R.R.I.M. is '*SEARCHING, KUALA LUMPUR*' and the telephone number is *KL 64520* (10 lines). Senders' addresses should be written legibly on the outside of all packages (occasionally, some arrive without any indication of their origin!); advice of their despatch by letter or telegram is requested.

PROHIBITED PLANT SPECIMENS. Plant Importation Rules prohibit the import into the States of Malaya of any part of a plant (living or otherwise), unless accompanied by a permit issued by the Director of Agriculture. Permits are not issued in respect of any diseased plant or plant pest and all materials imported in contravention of the Rules (which aim at preventing the introduction of diseases and pests) are destroyed without examination. Hence, any person outside the States of Malaya who desires R.R.I.M.'s advice on any matter which may require examination of specimens should first ascertain whether such material could be imported.

ADVICE. Rubber producers in Malaysia, Singapore, Brunei and Nigeria may seek R.R.I.M.'s advice in regard to their special problems. Visits may be made by the Institute's research and advisory staff to estates and holdings in the States of Malaya as convenient (by special arrangement only, in the case of holdings elsewhere). The only visits for which charges are normally made are those of our clone identification inspectors. Prior arrangements should be made regarding interviews.

PUBLICATIONS. Subscriptions to any or all of R.R.I.M. publications (including *The Journal, Planters' Bulletin* and *Reports*) may be entered by remitting a deposit of M$15 to the Institute; accounts regarding purchases will be rendered periodically. No discount is given for any purchases, however made, and postage is charged on oversea mailings. Lists of R.R.I.M. publications are available on request.

PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

Kuala Lumpur 1967 Main Contents

Planters' Bulletin 88

	Page
Editorial: Clones for the future	1
Planting Materials used on Estates in Malaya, 1965	4
Planting Recommendations 1967–1968	7
RRIM 600 Series Clones in Estate Trials	20
Foreign Exchange Clones: Third Report	29
RRIM 700 Series Clone Trials: Second Report	36
RRIM Clonal Seedling Trials: Second Report	40
Performance of Clones in Commercial Practice: Third Report	46
Notes, News and Views	49

Planters' Bulletin 89

Editorial: A New Look at Intercropping	53
Identification of Plants on Malayan Rubber Estates: Plates 65–72, Cassia species	55
Covers and Fertilisers for Immature Rubber	66
Cover Management	73
Precautions in the Use of Weed Killers	77
Rubber Processing Instructors' Diploma	81
Assisted Biological Coagulation of Latex	82
Notes, News and Views	83

Planters' Bulletin 90

Editorial: The Sodium Arsenite Ban	87
Identification of Plants on Malayan Rubber Estates: Plates 73–80, Dicotyledons, herbaceous or half-shrubby	88
Phytophthora Leaf Fall and Pod Rot	99
Dieback	107
Notes, News and Views	112

Planters' Bulletin 91

Editorial: Heveacrumb: Demand Outstrips Supply	119
Standard Malaysian Rubber (SMR) Progress Report and Present Trends	121
Improvements in the Production of PA 80	127
Specification for Castor Oil for Use in the Production of Heveacrumb Rubbers	138

Planters' Bulletin 91 *(Continued)*

	Page
Weed Control with 2,4-D Amine/Sodium Chlorate Mixtures	139
Pruning to Prevent Wind Damage	147
Notes, News and Views	158

Planters' Bulletin 92 (Planters' Conference Issue)

Conference Review: Planting Methods and Practice	159
Some Aspects of Estate Replanting and New Planting Costs	164
Clearing Methods and Root Disease Control	176
Tree Poisoning	183
Some Technical Aspects of Green Budding	190
Green Budding Under Shade	198
Green Budding at Stake	204
Effect of Taproot Pruning on Growth of Soil Core Budded Stumps	212
A Study of the Comparative Merits of Different Planting Techniques	214
Comparison of Nursery Methods of Budding Planting Material	221
Nursery Experimentation at Chemara Research Station	233
R.R.I.M. Crown Budding Trials	240
Data from Chemara Crown Budding Experiments	250
The Soil Core Method of Transplanting Young Rubber as Practised on Kirby Estate	256
Commercial Experience with a Plant Extraction Technique	264
Preparation of Basketed Green Budded Stumps for Year Round Planting	270

Planters' Bulletin 93

Editorial: Accepting the Challenge	279
Bird's Eye Spot	281
Snails and Slugs	284
Budgeting for Small Estate Factories	288
Economic Use of Fertiliser in Mature Rubber	300
The Production of Latex Concentrates with Increased Stability to Freezing	307
Notes, News and Views	314
Index 1967	319
